
Foundry Makers Collective, Workshop Rules & Equipment

About this Community

Foundry Makers Collective is a vibrant community of builders, artists, and tinkerers who come together to create, learn, and share. Across our locations in North America, members work side by side on projects of all kinds — from first-time experiments to professional-level builds.

Our rules are designed to prioritize safety, ensure fairness, and promote care for shared tools and spaces. We believe that beginners should always feel welcome to try new things, and that experts should feel supported in pushing the limits of their craft. By looking out for one another and our shared resources, we keep the Collective a place where creativity can thrive.

This handbook includes practical guidance for:

- Safety checkouts before using tools or equipment.
- Personal protective equipment (PPE) requirements and best practices.
- Booking and queue systems for high-demand tools or...

Sample Rules / Principles

• Safety Orientation & Tool Checkouts

Required class + hands-on checkout for each tool category; badge levels.

• PPE, Dust Collection & Clean-as-You-Go

PPE icons at stations, dust control steps, and end-of-shift cleanup checklist.

• Teaching, Demos & Certification

How to propose a class, certify helpers, and collect feedback.

• Materials, Storage & Labeling

Approved materials, resin/solvent handling, and dated storage tags.
