
Climate Action 2030

About this Community

Climate Action 2030 is a global, community-run jurisdiction focused on practical, measurable steps that cities, neighborhoods, campuses, and small businesses can adopt immediately. We emphasize rapid decarbonization, local resilience, and fair transitions pairing ambitious targets with checklists, timelines, and accountability. The goals below reflect near-term actions 2026 and staging for deeper cuts by 2030. Each rule includes the rationale, implementation guidance, equity considerations, and metrics (how to audit progress quarterly).
