
Buford Robotics & STEM Club (FLL/FTC)

About this Community

Hands-on robotics club for Buford Elementary/Middle, safe shop, quick decisions, clear budget, fun builds.

Sample Rules / Principles

• Team Chat Guidelines

Group chat = kind, helpful, on-topic. No late-night pings; use threads for sub-teams so info is easy to find.

• Design Review Checkpoints (15 minutes)

Before we cut or print: quick design check with a mentor. Keeps us from oops moments and wasted filament.

• Meeting Schedule & Attendance

Build nights are Tue/Thu 6–8 pm + Sat 10–1. If you're late, text the group so mentors can help you catch up.

• Parts & Purchases (ask if over \$50)

Small stuff we grab quickly; anything over \$50: drop it in the parts list so we can approve and track.
